

 **CORMAY  
DIAGNOSTICS**

**The lifeline to better health**

## The lifeline to better health

We are constantly developing innovative In-Vitro Diagnostic solutions to accurately uncover the truth hidden in a single drop of blood. Our actions help to understand the known and discover the unknown, leading to the earliest detection, treatment and monitoring of the health of patients all over the world. Our cutting-edge In-Vitro Diagnostic solutions provide the lifeline that connects doctors and clinicians to their patients to deliver a positive health outcome.

## For over 35 Years

### We connect Healthcare Professionals with European Quality & Innovation in IVD

CormayDiagnostics has a lot of experience and know-how in producing comprehensive range of market leading Clinical Chemistry and Hematology reagents, together with innovations and patented technology have allowed us to deliver outstanding performance and reliability of our IVD solutions.

On business level we connect experienced manufacturer of reagents, Cormay with the outstanding technology knowledge of Swiss hematology company, Orphee to build the IVD brands that have been trusted by healthcare professionals from all over the world.

## We Connect people in need with tests that can help them in their fight for health.

Our unwavering commitment to providing healthcare professionals with more effective tests that guarantee consistent, high-quality results and expert diagnosis ensures that patients around the world can count on a quick and healthy recovery.

## Continuous investment in Innovation, Technology, Research & Development

We recognize the need to obtain results that are both accurate and fast. Cormay Diagnostics makes affordable to small and mid-size clinical laboratories all over the world the cutting-edge technology and performance demanded by large clinical laboratories.

## We are driven by Quality

We care to deliver accurate tests results because **patients are our first priority**. By connecting doctors, clinicians, diagnosticians and patients with high-quality products, we change healthcare globally.

### Reliability

We manufacture products that deliver tests results you can trust.
